We, sanotact GmbH, hereby confirm:

Bovine Spongiforme Enzephalopathie / Transmissible Spongiforme Enzephalopathie (BSE/TSE)

...that we do only use substances in the production of the above listed products that are free from the risk regarding Transmissible Spongiform Encephalopathy (TSE) and Bovine Spongiform Encephalopathy (BSE), according to suppliers' information. The above listed products are in accordance with Regulation No. 999/2001/EC.

Genetically Modified Organisms (GMO)

... that we do only use substances in the production of the products listed above that are in accordance with the European Regulations (EC) No. 1829/2003 and (EC) No. 1830/2003 concerning the labelling and traceability of genetically modified organisms (GMO) and of food and feed produced from GM organisms.

The products are neither produced from nor consist of genetically modified organisms, according to our supplier's information.

Contaminants

... that we do only use substances in the production of the products listed above that are in accordance with the Commission Regulation (EU) No. 2023/915 setting maximum levels for certain contaminants, e.g. heavy metals, aflatoxins and dioxins in foodstuffs according to our suppliers' information.

Microorganisms and fungi

... that we do only use substances in the production of the products listed above that are in accordance with the Commission Regulation (EC) No. 2073/2005 concerning the microbiological criteria for foodstuffs according to our supplier's information.

Hormones

... that we do not use any hormones in the manufacture of the products listed above. Hormones are only allowed to be used in medicinal products but are not allowed to be used in food supplements.

Radioactive materials

... that we do only use substances in the production of the products listed above that are in accordance with the Regulation on the treatment of food with electron, gamma and x-rays, neutrons or ultraviolet rays (Food Irradiation Regulation - LMBestV) and Directive (EC) No. 3/1999.

Alcohol

... that we do not use any alcohol in the manufacture of the products listed above.

Pesticides

... that we do only use substances in the production of the products listed above that are in accordance with the Regulation (EC) No. 396/2005 setting maximum residue levels of pesticides in or on food and feed of plant and animal origin.

Food additives

The use of food additives in foodstuffs (including food supplements) is covered by Regulation (EC) No. 1333/2008 on food additives. Only approved food additives are used in our products. The approval, which sometimes includes a specification of maximum quantities, is also based on an evaluation by the EFSA (European Food Safety Authority). Anabolic steroids, anti-inflammatory steroids and psychotropic substances are not allowed to be used in food supplements.

Yours sincerely
sanotact GmbH
